Bug-Tracking:

Bug tracking is the process of logging and monitoring bugs or errors during software testing. It is also referred to as defect tracking or issue tracking. Large systems may have hundreds or thousands of defects. Each needs to be evaluated, monitored and prioritized for debugging. In some cases, bugs may need to be tracked over a long period of time.

“Defect tracking is an important process in software engineering, as complex and business critical systems have hundreds of defects,” says Tutorials Point. “One of the challenging factors is managing, evaluating and prioritizing these defects. The number of defects gets multiplied over a period of time and to effectively manage them, a defect tracking system is used to make the job easier.”

Bug tracking is an essential component of any software testing process. It allows for the recording and management of all aspects related to a bug, and also provides a central place to report bugs and track their progress. However, to better understand the bug-tracking process, it helps to consider how bugs progress through stages, from when they’re first reported until they’re resolved.

How bug tracking works

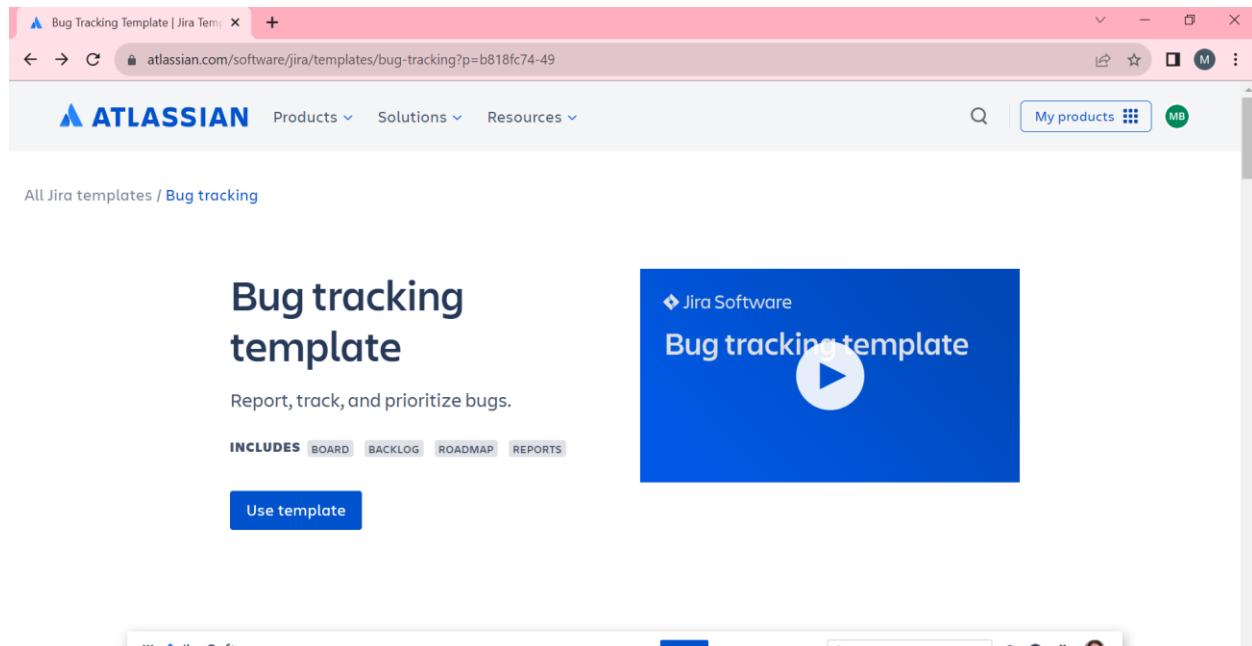

A software bug occurs when an application or program doesn't work the way it is designed to function. Most errors are faults or mistakes made by system architects, designers or developers. Testing teams use bug tracking to monitor and report on errors that occur as an application is developed and tested.

What is issue tracking

Issue tracking is a way of keeping track of errors, bugs, and other flaws that users encounter when interacting with a product.

For instance, these flaws can be a broken button, a confusing design choice, an authentication error, or any other issue that causes some sort of adverse effect on the user. However, it's important to note that issue tracking is more than a simple list of user experience defects.

As we already mentioned, issues can also include business requirements and project management problems, as well as technical defects.

The screenshot shows a web browser displaying the 'Bug Tracking Template' page from Atlassian Jira Software. The URL in the address bar is atlassian.com/software/jira/templates/bug-tracking?p=b818fc74-49. The page features a pink header with the Jira logo and a red bar containing the template name. Below the header, the Atlassian navigation bar is visible with links for Products, Solutions, and Resources. A search bar and a 'My products' button are also present. The main content area has a light gray background. On the left, there's a section titled 'Bug tracking template' with a sub-section 'Report, track, and prioritize bugs.' and a 'Use template' button. On the right, there's a large blue rectangular area with the 'Jira Software' logo and the text 'Bug tracking template' next to a white play button icon. The overall layout is clean and professional, designed to guide users through the template setup process.

This screenshot shows the Jira Software Issues page for the 'My-BugTracker' project. The sidebar on the left displays filters for 'All issues', with 'My open issues' selected. Two bugs are listed in the main pane: 'Registration-page' (MB-2) and 'Login-Autofocus' (MB-3). The 'Registration-page' bug is currently selected, showing its details: status 'In Progress', created by 'MB', and last updated on '06-09-2023'. The 'Login-Autofocus' bug is also visible with the same status and creation details. The bottom of the screen shows a Windows taskbar with various icons and system status.

The screenshot shows the Jira Software Issues page for the project "My-BugTracker". The left sidebar displays filters for "All issues", "My open issues" (which is selected), "Reported by me", "Open issues", and "Done issues". The main area lists two issues: "Login-Autofocus" (MB-3) and "Registration-page" (MB-2). The "Registration-page" issue is currently selected, showing its details: status "In Review", assignee "Current User", and a description field. The Jira header includes tabs for "Bug Tracking Template | Jira Tem...", "[MB-2] Registration-page - Jira", "[MBT-1] Registration-page - Jira", and "New Tab". The bottom of the screen shows a Windows taskbar with various icons and system status.

This screenshot is identical to the one above, except the status of the "Registration-page" issue has been changed from "In Review" to "Done". The Jira interface remains the same, with the "My open issues" filter selected and the "Registration-page" issue details visible. The Windows taskbar at the bottom is also present.
